

Week 3: Relational Data Blending & Multi-Table Joins

Target: Map product SKU transactions back to affiliate tracking links

```
SELECT
    u.user_id,
    u.email,
    u.acquisition_link AS affiliate_tracking_link,
    p.order_id,
    p.product_sku,
    p.amount_paid,
    P.purchase_timestamp

FROM
    users_table AS u

INNER JOIN
    purchases_ledger AS p
    ON u.user_id = p.user_id

WHERE
    u.acquisition_link LIKE '%affiliate%'
    AND p.order_status = 'delivered'

ORDER BY
    p.purchase_timestamp DESC;
```
